Arizona Geological Survey Open-File Report 12-18

October 2012

Curating and documenting this collection was supported by the State of Arizona and the U.S. Geological Survey National Geological and Geophysical Data Preservation Program Grant #G11AP20180.

The views and conclusions contained in this document are those of the authors and should not be interpreted as representing the opinions or policies of the U.S. Government. Mention of trade names or commercial products does not constitute their endorsement by the U.S. Government.

Introduction. In January 2011, the Arizona Department of Mines and Mineral Resources (ADMMR) was closed due to a lack of operating funds. Subsequently, Governor Jan Brewer signed into law a consolidation of ADMMR with the Arizona Geological Survey (AZGS), effective July 1, 2011. As part of this merger, AZGS took custody of all ADMMR files and assets. Governor Brewer's office requested AZGS inventory, catalog, and scan all ADMMR records and files to ensure their preservation and to improve accessibility to them by industry, government, and the public.

At the Governor's request, a one-time appropriation of \$100,000 was approved for AZGS in fiscal year 2012 (FY12) to digitize and preserve the ADMMR files. AZGS received an additional \$41,495 from the USGS National Geological and Geophysical Data Preservation Program for FY12.

Beginning in July 2011, AZGS undertook to inventory and catalog the analog files held by ADMMR, as the first step in what is expected to be a multi-year program to create a digital archive with complete metadata for all materials. Further, we plan to integrate the ADMMR data repository into a statewide system linked to the USGS National Digital Catalog and the USGS-AASG Geoscience Information Network (USGIN).

By August 2012, we completed collections level inventories of all materials in the ADMMR archives: 13,500 folders of mining records from 22 collections; approximately 10,000 maps in the ADMMR map collection; and 7,400 photographs from 6 collections. Collection inventories are available as free AZGS Open-File Reports at the AZGS Document Repository (repository.azgs.az.gov).

AZGS created a record for each item according to the ISO 19115 schema. This includes geographic bounding boxes, descriptions, thematic keywords, spatial keywords, temporal keywords and preservation metadata, which will be compatible with the USGIN catalog and the National Digital Catalog Metadata Profile. Once digitized, files will be accessible for download through the AZGS Document Repository and the USGS National Digital Catalog.

Description

In the 1930's the Reconstruction Finance Corporation was created by the Federal Government to finance the development and operation of gold, silver and tin mines. The funds were to come from the "Silver Purchase Act" which purchased silver from the miners for 71 cents per ounce and produced coins valued at \$1.29. In previous years the loans were only available to gold, silver and tin mines but the law was amended in 1941 making the funds available to operators of all metal mines.

The RFC contacted the Department asking it to provide an analysis and review of applications from Arizona for preliminary development loans. The Board meeting of 7/11/42 authorized the Department to enter into an agreement with the Reconstruction Finance Corporation to review the applications and make recommendations for loans.

The mine owner made an application to the Federal Government for a loan. This application with the accompanying information was sent to the Department and was reviewed with the field engineers in that particular area. The field engineers visited the mines, talked to the owners, discussed plans, and advised owners when necessary if plans were not detailed enough. They also made recommendations as to whether or not the loan should be granted. These files are the result of their investigations.

Subject

Mines and mineral resources--Arizona; Geology, Economic--Arizona

Acquisition

These reports were made by the Arizona Department of Mines and Mineral Resources during its collaboration with the Reconstruction Finance Corporation. The Arizona Geological Survey received them from ADMMR in 2011 when it took custody of the agency's records.
